

**REDACTED COMMENTS**

***Disclaimer:***

*There are more than 65 feedback responders, with some sending in multiple documents and responses. Many reaching more than 3 pages and including a lot of technical information.*

*This document has been constructed by a volunteer and consists of (as far as possible) data which has been redacted to protect the privacy of those submitting feedback.*

*Some editorial amendments or deletions have been made and in some case this includes whole sections of submitted documents including sections of prefaces, context and/or background information, (particularly provided by consultants) has been removed. This has been done purely in an attempt to make the document more readable, but no actual feedback on the NDP has been removed.*

*Please note that spellings and/or typos and irregular spacings are likely to be a result of the compiling (copy and paste or typing).*

*If you would like to check your own feedback or have any queries with regards to this document, please email [clerk@kingsomborne-pc.gov.uk](mailto:clerk@kingsomborne-pc.gov.uk).*

***FEEDBACK STARTS BELOW:***

The large majority of housing along Romsey Rd only exists directly adjacent to the road. Development on KS3 is creating a major second layer of development off Romsey Rd, which does not exist to any major degree anywhere else along this route. This could set a precedent for future development." 3.1 pg7

You talk about maintaining the beauty and characteristics of the villages surroundings. The KS3 site is visible from several view points whilst walking from the village ie Froghole Lane and Clarendon Way on the ridge above. Surely this is a contradiction." "KS3 is the only site chosen that directly affects the borne. The borne is arguably the greatest characteristic that gives Kings Somborne it unique feel and charm. Further development along the borne can only destroy this uniqueness. Furthermore, the village of Kings Somborne falls within the Mottisfont Bats SAC. The borne, grassland and broadleaf woodland of KS3 are all environments that need to be preserved. As recommended in the environmental study concerning the Barbastelle Bat population in the Mottisfont area.
